Motorcraft® Wire Splice/Shrink Tubing Packages

- The new Motorcraft® wire splice/heat shrink packages are to be purchased as replenishment parts for the new ROTUNDA Wire Splice Tool Kit. They contain 5 uninsulated butt splices, 5 pieces of dual wall adhesive-lined heat shrink tubing, and the new instruction sheet detailing the approved wire splice procedure as defined by Ford Motor Company.
- The package will construct five complete splice repairs and are available in three wire ranges:
Motorcraft® Part #: Wire Range
WT-56814 22-18 AWG
WT-56815 16-14 AWG
WT-56816 12-10 AWG
Expanded wire gauge applications for these splices can be found in TSB 03-11-6
- Ford Engineering has determined that the combination of the crimped uninsulated butt splice, insulated with a 2" piece of adhesive-lined heat shrink tubing, has proven superior in terms of strength, durability, and corrosion resistance. When heated, the tubing shrinks and the adhesive lining melts and flows to form a rugged, environmentally sealed barrier against corrosion, and eliminates the potential deterioration of the vehicles electrical wiring harness.
- As separate components, these butt connectors and heat shrinkable tubings are known for their superior quality and performance. Combined, you cannot achieve better results, and this is precisely why Ford Motor Company has chosen this combination for repairing wiring harnesses.
- Recommended Applications Tools:
164-R5901 Ford Approved Crimp Tool
164-R5902 Shielded Flameless Heat Gun
