Ford **remote** START SYSTEMS

outstanding in security and convenience!

Bronze – The Bronze Kit includes the remote start feature, two programmed keyfobs, a maximum range receiver/antenna, activation of pre-set heater/air conditioner controls, a car finder feature, and visual confirmation of operation (via a flash of the parking lights).

Silver – The Silver Kit includes all of the above features plus keyless entry, power door lock control, illuminated exit and entry, and power trunk release. Available options include remote two-stage door locking/unlocking, headlight activation and rear window defroster activation*.

Gold – The Gold Kit includes all of the above features plus an alarm system which includes an impact sensor, a 125-decibel siren, warning chirps for non-threatening impacts, and a super bright LED warning light. The Gold Kit also offers remote activation of the headlight and rear window defroster*.

*Not all dealers offer all options.
Additional installation charges may apply to options.

nothing is even remotely close in terms of comfort and convenience!

Ford Motor Company now offers a remote start system on all of its North American built vehicles with automatic transmissions. This is a dealer-installed option that integrates seamlessly with all factory-installed options.

The remote start system enables you to start your vehicle from up to 500 feet away. And the start signal will travel through walls—so you don't have to leave the comfort of your home or workplace to start your car.

The system is available in three different kits—Gold, Silver and Bronze. The kit that's right for you depends on the options that you already have on your vehicle, as well as your desire for additional options (such as keyless entry and/or a security system) you may want to add in conjunction with the remote start system. Your dealer will help you choose the system that's right for you and your vehicle.
